Easy to plug in
new partners

No local coding

- Easy setup
- Import of matching schemes
- Standard Nav GUI Pre-built

Cloud service

SaaS

Get control of your costs

*Now also available with full integration
to InExchange Network*

THE CHALLENGE

Traditional EDI is struggling with a lot of challenges and problem areas and don't always meet today's business's needs.

LACK OF INTEROPERABILITY

Many standards, formats, protocols, ways of communications, etc.

NONE OR BAD PROCESS INTEGRATION

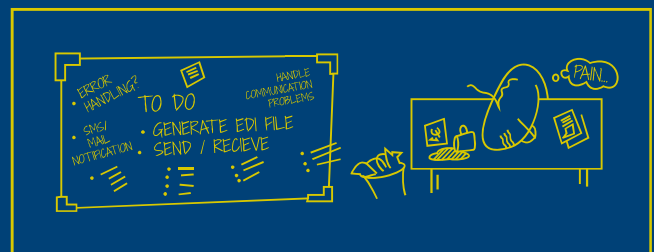

Supports mostly document integration but not efficient process integration.

NOT REAL-TIME

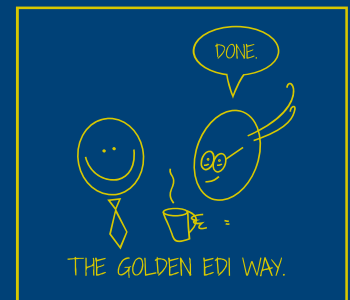

Batch architecture and no real-time interaction.

EXPENSIVE

It's a challenge to get control over total cost, due to complex implementation environments and instable solutions that demands huge support, maintenance and time for error resolution.

CHOOSE YOUR DESTINY

THE GOLDEN EDI WAY

Today's needs for interaction between companies still includes traditional EDI Documents, but is moving towards more modern real-time solutions that integrates the businesses of the parties.

THE INTEROPERABILITY PERSPECTIVE

Smart conversion and mapping methods makes this easy.

THE BUSINESS PROCESS PERSPECTIVE

Integrated process workflow support and full Support for Business Rules.

THE REAL-TIME PERSPECTIVE

Information exchange in real time using a variety of methods.

THE COST PERSPECTIVE

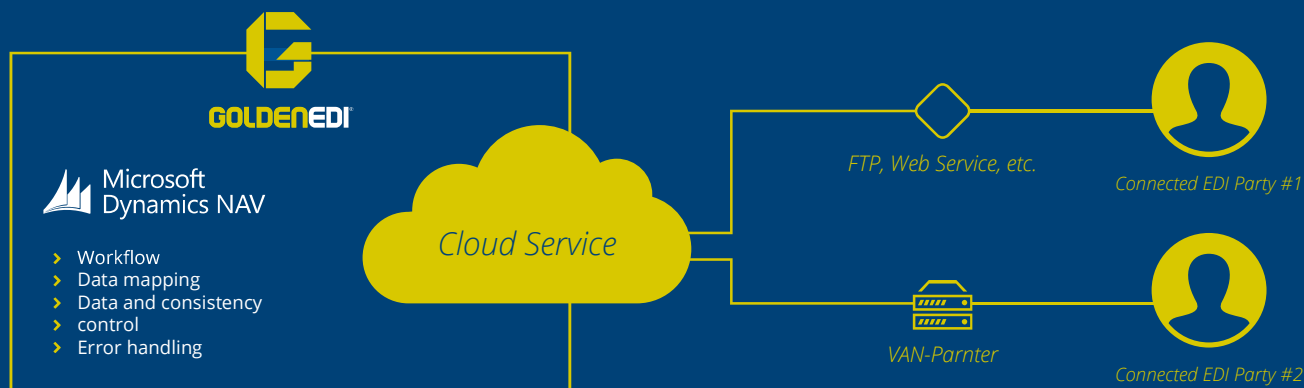

Streamlined and simple implementation and flexible consumption models.

THE SECURITY PERSPECTIVE

Error handling on different levels to avoid data loss or fatal stops in the process.

GOLDEN EDI

Golden EDI is built with purpose to address and deliver on today's requirements for customers that invests in capabilities that will gain new efficiencies in their value chain.

Golden EDI is a combination of two components, one installed in Microsoft Dynamics NAV and one in Azure Cloud, communicating with Web-service for incoming and outgoing messages / documents.

From the Cloud Service the communication reach other parties through FTP, Web-service, HTTP, etc. The communication is directly with the parties or through a VAN-partner if necessary.

GOLDEN EDIS' MAIN CAPABILITIES

PROCESS INTEGRATION, WORKFLOW, BUSINESS RULES, DOCUMENT STATUS

Seamless process integration, all EDI interaction/handling is integrated as a natural part of the main process.

An indicator is built into Golden EDI to show the status of the document exchange. The status works both on incoming and outgoing documents and helps the user to follow the process in real-time.

Provides fully workflow support using Microsoft Dynamics NAV standard workflow/triggers connected to a setup of different types of actions and events. Provides control checkpoints and consistency validations.

All type of data in Microsoft Dynamics NAV is possible to exchange, not only traditionally EDI document/information.

MONITORING, ERROR MANAGEMENT

Monitoring, full overview for each flow, error handling, full traceability, notification by SMS and E-mail.

INTEROPERABILITY, CONFIGURATION/MAPPING VS PROGRAMMING

There is no need for programming inside Microsoft Dynamics NAV!

Instead, configurations, mappings, business rules, datachecks, eventhandling is done inside Microsoft Dynamics NAV. Messageformat is configured and converted in our cloud service.

We provide a default setup of configurations, and business formats that will give a quick start. Easily to connect new parties with configurations in our Cloud Service, VAN, customer direct, etc.

INFORMATION/DATA ACCURACY

Our configurable datachecks and business rules cooperate together with data consistency checks that is standard in Microsoft Dynamics NAV and gives a stable and secure solution.

Mapping, direct information, in and out, to its proper fields, unique mapping down to each party, convert information, fixed information.

Consistency, error management to avoid incorrect sending or receiving.

MAKING GOLDEN EDI A PART OF YOUR OFFER

By becoming a Golden EDI partner you are able to provide **more value to your customers** without having to bother about implementing and integrating EDI into the ERP system.

Instead of spending your time on the implementation details in the ERP system, you may focus on the business cases and the EDI formats to use.

PRICING

The Golden EDI Cloud Service is provided as a subscription. There are four levels: **Mini, Small, Medium** and **Large**. In addition, we also offer a free version that you may use for testing purpose to get started.

Please ask for our current pricelist.

GET STARTED

- **Install the Golden EDI Extension for Microsoft Dynamics NAV**
By using Microsoft Dynamics NAV, you already have access to the Golden EDI extension. You can of course choose to install as a fob- or txt file as well.
- **Sign up for a free Golden EDI Cloud Service account**
- **Send your first EDI message and View the Results**
Send an EDI message to the Golden EDI Cloud service and watch it end up in your Microsoft Dynamics NAV installation.
